Mar 16, 2025, 4:46 PM
- Guys
- We changed the questions about running shoes (Laufsachuhe) otherwise because we made the filtertechnology and then we have seen thats is much too complicated also for you we thought its better for our sites if we change the questions like this as we have now in figma so its less work later!!!
- And also an Product page is a small small change please change this
- And the Green you often use is the false green please go through it and use always our green
- Thats all please correct it and we are finished with the design thanks for the fast work

 Me Mar 18, 2025, 12:38 PM
Thank you so much.

The image shows a Java code snippet on the left and a document thumbnail on the right. The code is a Java class named `Callout` with a `callout` method that takes a `String` parameter and returns a `String`. The code is as follows:

```

1  public class Callout {
2      public String callout(String s) {
3          return s;
4      }
5  }
6
7  public class ApplicationC {
8      public static void main(String[] args) {
9          Callout c = new Callout();
10         String s = c.callout("Application C (603.76 kb)");
11         System.out.println(s);
12     }
13 }

```

The document thumbnail on the right is titled "Application C (603.76 kb)" and shows a document with a header "Application C" and a body containing the text "Application C (603.76 kb)".
